CALF MANAGEMENT EXPERTISE

Calf housing options from calf professionals

For more than 35 Years, Calf-Tel® has been listening. We listen to the most progressive farmers who put the “calf first”. When the welfare of the calf is the first priority – innovation in caring for them follows. The result is the industry leading product in this catalog and more productive herds.

Calf-Tel®. Heart Meets Smart.

THIS IS WHAT MAKES IT A CALF-TEL®

We Go with the Flow

Ventilation is critical in limiting respiratory illness and eliminating heat stress. The flow of air is strategically engineered into Calf-Tel® hutches, and enhanced by an extra-large adjustable ventilation opening (largest in the industry) for maximum comfort and breathability. Our indoor pen systems feature the AirMax panel for improved air-flow in challenging conditions.

We Promote Biosecurity

Calf-Tel's smooth surfaces don't have any pores, making them not only impervious to said undesirables, but super-easy to clean and maintain. When combined with proper management practices, calf raisers have found that our housing systems contribute to lower mortality, morbidity and overall treatment costs leading to enhanced calf growth.

Money Talks

For over 35 years, Calf-Tel® has been producing products that are built to stand the test of time. Longer lasting product leads to lower lifetime costs. Combine this with the cost savings and benefits of superior calf health and you can see why approximately 2 million calves are raised in Calf-Tel® housing systems worldwide each year.

CALF-TEL® MULTIMAX

— Outer dimensions

PRODUCT FEATURES & BENEFITS

„Calf-Tel® is the best value. The product is healthy for the calf and easy for the producer.“

STANISLAW KASPROVICZ

COMMON WAYS THE MULTIMAX IS USED:

Prepared Site:
Place the MultiMax on a well-drained surface (gravel, crushed stone or sand). This will keep calves dry and healthy. Outside pen required.

Rotating Site:
Place one MultiMax in a small pasture and move the unit and its pen periodically.

Large Common Pasture:
Place multiple MultiMax's in a large pasture with bigger groups. Position the units near each other, as the herd will not separate to housing in different locations.

CALF-TEL[®] ECS ELEVATED CALF SYSTEM

A SUPERIOR ALTERNATIVE
TO WOOD HOUSING

— Outer dimensions

- ✓ Easy to move, manage and maintain your units.
- ✓ Much easier to clean than wood hutches.
- ✓ Minimizes bedding, feed times and general labor.
- ✓ Fits inside of a standard 8' x 5' wood base and provides more room for the calf.

*hutch only

PROVEN PRODUCTS

CALF-TEL[®] FENCES

— Outer dimensions

STANDARD WIRE FENCE

Available with or without feed openings.
Crafted of ¼" diameter hot dip galvanized steel.

CALF-TEL® COMFORT FENCE

Compatible with: Compact, ECO, Pro II, Deluxe II, XXL

Optional wheel set for Calf-Tel® Comfort fence (can also be retrofitted).

CALF-TEL[®] MULTIMAX FENCE

— Outer dimensions

Optional milk bar, height-adjustable, for 5 nipple pails and stainless steel trough with drain valve (can also be retrofitted).

HUTCH LAYOUTS

Consider spacing needs between hutches. Keep at least 10 feet / 300 cm between each row and 1 foot / 30 cm between each hutch to prevent calves from touching and reduce the spread of disease. Make sure to allow enough space to access hutches with feeding and bedding equipment to maximize labor efficiency.
